

DOG LOVES COUNTING

by Louise Yates

This is a story about a dog who can't sleep so he sets off on an adventure to count creatures.

Point to each number as you count during the story.

Everyday Numbers

Numbers are all around us! Try pointing out numbers when you're out and about - on doors, signs and on the front of buses. Talking about numbers around you will show your child that numbers are part of everyday life.

Sleepytime Games

Playing sleepytime games is a fantastic way to develop your child's attention skills.

It's also great for winding down energy levels towards the end of the day.

You could try sleeping lions - chat gently and quietly as your child pretends to be a lion going to sleep.

1, 2, 3, 4, 5, Once I Caught a Fish Alive

Count on your fingers as you sing!

*One, two, three, four, five,
once I caught a fish alive.
Six, seven, eight, nine, ten,
then I let it go again.
Why did you let it go?
Because it bit my finger so.
Which finger did it bite?
This little finger on the right.*
